

DigiBlu Quick Start Guide

DigiBlu is a Bluetooth device that connects to a digital tachograph to wirelessly download data and display real-time driver hours on a phone or tablet.

Setup

Pairing DigiBlu with your mobile phone

1. Insert the DigiBlu into the tachograph
2. In the DigiDownload App, click the Bluetooth icon to open settings
3. Click on 'paired device' and select the DigiBlu
4. Enter the PIN from the printed barcode on the DigiBlu box*
5. Device is ready to use

**Please note that the PIN is only displayed on the printed barcode on the DigiBlu box; be sure that you keep a record for future reference.*

Settings

DigiDownload App

- Configure file format (.DDD, .V1B, .C1B or TGD)
- Vehicle download options
- Add destination email address or to digicentral to import directly to OPTAC3

Data Download

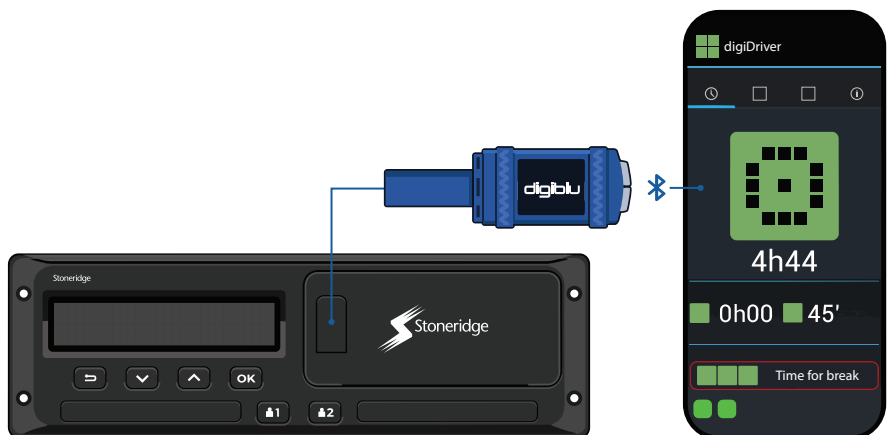

The DigiDownload app allows you to download driver's card and tachograph data when a company card is inserted.

1. Insert the company card and/or driver's card
2. Open DigiDownload app
3. Select vehicle unit or driver card data
4. Tap Download

After a successful download, files can be saved on your mobile, emailed or sent to OPTAC3.

Download Driver Card using the Card Reader*

1. Insert your DigiBlu into the card reader with the label on the outside.
2. DigiBlu should pair with your Android device automatically. Now insert the driver card with the chip facing up, the same way that you insert the card in the tachograph.
3. Use the DigiDownload app to download driver card data and send it via email or store it on your Android device.

**card reader sold separately*

The OPTAC support team is always available to assist you with any questions you may have. Please feel free to contact us at optac@stoneridge.com.

Real-Time Driver Hours

The DigiDriver app provides a real-time data feed which monitors your driver hours and provides visual warnings when you need to take a break. Please be aware that this information is downloaded only from the DDS data in the tachograph.

- Constant monitoring of DigiBlu data stream from the tachograph
- Graphical display of real-time drivers hours based on current EU regulations
- Visual indicators of drive time remaining

Download the Apps

The apps required to use DigiBlu are available for download on the Google Play Store.
